<b>BACTERIOLOGY</b>	
Suggestions for Laboratory Work in —.	
C. M. Hilliard	134
<b>BIOLOGICAL BRIEFS</b>	
(Abstracts from the literature.) Ruth Sherman	
126, 158	
<b>BIOLOGICAL STATION</b>	
Work of the Mountain Lake —. Ivey F. Lewis	
109	
<b>BIOLOGY TEACHER ASSOCIATIONS</b>	
Reports from Local. —. 13, 41, 58, 137, 192	
<i>National Association of Biology Teachers</i>	
Constitution of the —	4
President's Message. M. C. Lichtenwalter	12
Biology Teachers Begin to Pull Together. O. Riddle	1
<i>Vivo Ex Vivo</i> (Editorial). I. A. Herskowitz	12
The First Annual Association Meeting, Richmond, Virginia. M. C. Lichtenwalter	37
The Richmond Meeting of the —. M. C. Lichtenwalter	57
Our Next Step (Editorial). I. A. Herskowitz	76
The Opportunity and Obligation of the —. O. Riddle	116
Local Affiliates vs. The National (Editorial). M. C. Lichtenwalter	128
<b>BIOLOGY TEACHING AIDS</b>	
Anatomy—"Visualization of the Vertebrate Skeleton in the Entire Specimen by Clearing and Selective Staining." Alden B. Dawson	
91	
Bulbs for the Laboratory	
8	
Charts	
9	
Circulation, The — of Blood	
8	
Classification—"In the Laboratory." Philip E. Foss	
101	
Drawing Aid	
8	
Equipment—"Ground Squirrels as Laboratory Pets." Douglas Salisbury	
102	
Inexpensive Cages	
8	
"An Omnarium." Prevo L. Whitak	
79	
A Seine for Small Animals	
8	
Storage Cans	
8	
Fossil Mounts	
8	
Gelatin Mounting	
9	
Insects—"A Nest of Hornets for Your Laboratory." P. K. Houdek	
40	
Moss, To Demonstrate — Plants	
8	
Photosynthesis, To Prove That Oxygen Is Liberated during —. Eva B. Ammidon	
39	
Reproduction—"Tropical Fishes in the Classroom." Ruth Sherman	
129	
Soap Modeling	
9	
Soil, Potting —	
8	
X-Ray Pictures	
9	
<b>BIOLOGY TEACHING—CURRICULUM</b>	
Bacteriology—"Suggestions for Labora-	
tory Work in — for High School Students." C. M. Hilliard	
134	
Biology—"— As an Upper Grade Subject." L. C. Frost	
160	
"Functional —." C. C. Crawford	
93	
"Let's Get Together" (Editorial). P. E. Foss	
56	
<b>BIOLOGY TEACHING—EQUIPMENT</b>	
The Modern Biology Laboratory. J. Roy Byerley	
14	
<b>BIOLOGY TEACHING—METHODS</b>	
Forum? (Editorial). J. A. Trent	
56	
The Problem Child and the Biology Project. E. J. Beebe	
74	
An Objective Approach to Biology. Charles W. Gouget	
81	
Developing Individual Pupil Interests in Biology. K. B. Sanders	
84	
How Shall a High School Pupil Use a Biology Textbook? L. J. Fitzpatrick	
105	
A Handling of the Topic: Cheese. Edith A. Purer	
125	
Modeling in the Laboratory. M. Anthony Payne	
181	
<b>BIOLOGY TEACHING—PHILOSOPHY</b>	
Biology for Contemporary Youth. Herbert A. Dwyer	
22	
"Of Our Making." D. F. Miller	
25	
The Importance of Biology Teaching for Secondary School Pupils. Paul Sears	
67	
Philosophy of Education for Biology Teachers. K. A. Sarafian	
96	
The Opportunity and Obligation of the National Association of Biology Teachers. O. Riddle	
116	
General Education and Secondary School Biology. F. L. Fitzpatrick	
147	
<b>BIOLOGY TEACHING—SUPPLEMENTARY READING</b>	
Supplementary Reading in Biology. Helen D. Osborn	
44	
<b>BIOLOGY TEACHING—TEACHER PREPARATION</b>	
A Program of Teacher-Education in Secondary School Biology Recommended by Teachers in Service. J. A. Trent	
28	
"What Would You Learn of Me?" (Editorial). B. B. Vance	
100	
<b>BIOLOGY TEACHING—VISUAL AIDS</b>	
Advantages of the Micro-Projector in the Biology Classroom. Helen Trowbridge	
10	
The Use of Objects, Specimens, and Models in the Teaching of Science. Elwood D. Heiss	
42	
The Use of Flat Pictures in the Teaching of Biology. Elwood D. Heiss	
108	
A Simple Micro-Viewer. Philip Goldstein	
122	
The Still Camera in Biological Presentations. L. C. Oglesby	
131	
<b>BOOK REVIEWS</b>	
<i>Biological Abstracts</i> . Reviewed by G. W. Hunter, III

## EVERDAY PROBLEMS IN BIOLOGY

Pieper—Beauchamp—Frank

A logical sequence of twelve units in which the pupil by observation, experimentation, and problem solving works out a well-rounded picture of the biological aspects of life around him.

Pupils' Study-Books, Objective Tests, and detailed free Teacher's Guidebooks furnish a complete program of teaching aids.

**SCOTT, FORESMAN  
AND COMPANY**

Chicago Atlanta Dallas New York

*From the Laboratory of  
PROF. I. V. PAVLOV*  
(Nobel Prize Winner)  
Comes a Study Unsurpassed  
In Thoroughness on the Subject of  
**The Nervous System**

A 16mm Silent Film in 5 Sections

1st Section—The Development of the Nervous System in Vertebrates and Invertebrates. 2 Reels

2nd Section—Reflex Action: Development of Neurons; Function of Motor Nerve; Responses to Stimulation; Etc. 1 Reel

3rd Section—The Spinal Cord: Study of the Function of the Spinal Cord 2 Reels

4th Section—The Brain: Structure and Function. 5 Reels

5th Section—The Study of Conditioned and Unconditioned Reflex Behavior in Different Organisms. 4 Reels

Sale—\$24.00 per reel  
Rental—\$ 2.00 “ “

For Arrangements Write: Dept. B

**For fundamental ideas in the field of Science**  
**SCIENCE AND LIFE**

presents a wholly integrated program in science instruction for grades seven, eight, and nine—foundation general science at its best. The first four books form one cycle for the seventh and eighth years. The last two books provide the second cycle which recapitulates and further develops science concepts in the ninth year.

This new science program is planned for the average student with a minimum of teacher help. For variation in pupil abilities, *Supplementary Activities* to each Unit include: Demonstrations and construction problems, Problem Questions, and Reports and discussions. Following each problem into which the Units are divided is a test for comprehension and review. These six books are simply, engagingly written and fully illustrated to create a genuine, comprehensive foundation in science knowledge.

**WHY ABSTRACTS?**

A good abstract:

- “(1) enables the reader to determine whether or not a paper is of sufficient interest to him to warrant his reading it;
- (2) it enables the teacher and general reader to keep themselves informed on the trend of current biological investigations with a minimum of effort; and
- (3) it enables any reader to peruse the article more intelligently than he could otherwise.”

(Smith, R. C., *Jour. Ee. Ent.*  
31 (5): 564. N 11, 1938.)

**USE BIOLOGICAL ABSTRACTS**

A non-profit service by biologists for biologists, a modern necessity for every biology department library. Are you primarily a zoologist, botanist, geneticist, bacteriologist? Subscribe personally for your special section and keep up with progress. Complete annual index goes to every section subscriber.

**Send your order now!**

**BIOLOGICAL ABSTRACTS, University of Pennsylvania, Philadelphia, Pa.**

Enter my subscription to:  BIOLOGICAL ABSTRACTS (Vol. 13, 1939) at \$25, postpaid. Abstracts of  General Biology at \$4.\*  Experimental Animal Biology at \$9.\*  Microbiology and Parasitology at \$5.\*  Plant Sciences at \$6.\*  Animal Sciences at \$6.\*

VIRUSES in Plants. L. M. Black	175

*(Continued from page 174)*

aims will not be reached by ordinary classroom or laboratory work in preparation for the ordinary examination, but they should come as a by-product of such work if it is conducted in the spirit of real science, by teachers who themselves are exemplars of this spirit. Education is habit-formation rather than information; illumination rather than indoctrination, inspiration rather than compulsion. "Whether there be tongues they shall cease, whether there be knowledge it shall vanish away, but now abideth faith, hope and charity"—in short, habits and character.

## Biology Teaching Aids

Thirty-one Instructional Sound Film Subjects Produced in Collaboration with Leading Subject Matter Specialists Now Ready

### PLANT LIFE SERIES

Plant Growth, Roots of Plants, Leaves, Flowers at Work, Seed Dispersal, Fungus Plants, The Dodder, Plant Traps.

### ANIMAL LIFE SERIES

The Frog, How Nature Protects Animals, Beach and Sea Animals, Tiny Water Animals, Butterflies, Moths, Beetles, Pond Insects, Aphids, The House-Fly, Spiders, Birds of Prey, Thrushes and Relatives, Animal Life, Reactions in Plants and Animals.

### PHYSIOLOGY SERIES

Mechanisms of Breathing, The Heart and Circulation, Body Defenses Against Disease, The Nervous System, Reproduction Among Mammals, Digestion of Foods, The Alimentary Tract, Heredity.

Others are to be Prepared

Write for Descriptive Literature

### ERPI CLASSROOM FILMS INC.

35-11 Thirty-Fifth Ave.  
Long Island City, N. Y.

## GENETICS CHARTS

A series of eight Heredity and Genetics subjects has been added to the growing series of Turtox Class Room Charts. These are based upon actual crosses made with lady-bird beetles, guinea pigs, peas and corn. They provide excellent demonstrations for presenting the fundamentals of Mendel's law.

Chart size 17 x 22 inches reinforced and punched for hanging. The Price is only 50 cents each.
